

the Stores Consulting Group

Are your eCommerce orders per labor hour less than 1.5 or items per labor hour less than 80? If so, we need to talk!

eCommerce Trends & Best Practices

Prior to Covid-19, eCommerce represented 2%-5% of total Grocery sales. Today, eCommerce sales have quadrupled representing 12%-20%+ of overall grocery revenue. While the sales growth is exceptional, the heavy cost of eCommerce fulfillment is having a negative impact on the P&L.

**Higher Volumes
=
Greater Labor Impact**

**As eCommerce sales continue to grow –
increases in fulfillment labor need to be mitigated!**

- ◇ Best in class technology, equipment, layout, processes, and labor management are key enablers for driving productivity results
- ◇ Best in class grocers are achieving 80+ IPH or 3-4 orders per labor hour
- ◇ Perishable fulfillment is especially complex and costly but solutions exist
- ◇ Fulfillment within the stores, dark stores or fully automated Micro-fulfillment Centers are options to explore
